FOR IMMEDIATE RELEASE

bit-x-bit Adds Nuix For E-Discovery Processing and Analysis

PITTSBURGH, August 26, 2015 - bit-x-bit, LLC, a leading e-discovery, digital forensics and data loss prevention consulting firm, announced today that it has added Nuix to its suite of e-discovery processing and analysis tools. Recognized by Gartner's 2015 Magic Quadrant for E-Discovery as a market leader in e-discovery software, Nuix will allow bit-x-bit to process and analyze data faster and more efficiently, resulting in cost savings to its clients.

"Nuix has significantly enhanced our capabilities in e-discovery, adding an industry-leading tool to our processing and consulting services. With Nuix we gain increased efficiencies, the ability to process a wide variety of data types, and greatly improved reporting and analysis capabilities. In combination with our other tools and services, we are well-positioned to handle cases of any scale and complexity," said Daniel Vogel, bit-x-bit's E-Discovery Processing Manager.

Nuix is a processing platform designed to process virtually all forms of unstructured data, including data in complex proprietary formats, email messages, social media posts, instant messages and other communications, documents, as well as images, audio and video. "With Nuix, bit-x-bit can process data directly from forensic images, and seamlessly integrate our computer forensics and e-discovery practices," said Clinton Field, bit-x-bit's Solutions Architect.

About bit-x-bit: Founded in 2007 and exclusively endorsed by the Allegheny County Bar Association since 2008, bit-x-bit is an e-discovery, digital forensics, and data loss prevention consulting firm providing expert technical services to law firms and companies of all sizes, including the AMLAW 100. Additionally, bit-x-bit is certified by the National Women Business Owners Corporation. For more information, please call 412-325-4033 or visit our website at www.bit-x-bit.com.

About Nuix: Nuix enables people to make fact-based decisions from unstructured data. The patented Nuix Engine makes small work of large and complex human-generated data sets. Organizations around the world turn to Nuix software when they need fast, accurate answers for digital investigation, cybersecurity, eDiscovery, information governance, email migration, privacy and more.
