

THE EVIDENCE. THE BACKSTORY.
THE INTELLIGENCE. **WE GET IT.**SM

Join us for Remote Work & Cyber Security Webinar

The rapid shift to a largely remote workforce in response to Covid-19 raises new concerns for lawyers, from potentially costly cyber security risks created by less-secure home networks to heightened scrutiny on ethical obligations when serving clients remotely due to our "new normal."

A new 30-minute webinar presented by bit-x-bit Executive Vice President and General Counsel John Unice will bring you up to date on important legal and security matters related to remote work.

Scheduled for Thursday, May 7 at 2:30 p.m. EST, the bit-x-bit webinar will cover:

- Key aspects of a recent ethics opinion (2020-300) from the Pennsylvania Bar Association, Committee on Legal Ethics and Professional Responsibility, which highlights areas of concern for lawyers working from home.

- With the ethical obligations as a backdrop, how best to protect your home work space and, by extension, your clients' information. We'll address technical best practices and other client confidentiality considerations for lawyers working from home.
- Finally, we will overview a new risk assessment tool recently developed by bit-x-bit to help our clients mitigate work-from-home risks. Known as SAfER (Security Assessment for Eliminating Risk), it quickly and reliably identifies at-home cyber security risks and recommends means of mitigation and/or resolution.

We hope you will join us on May 7 and encourage you to contact bit-x-bit with any questions. To sign up, click the button below. We will then send log-in credentials directly to you, and look forward to seeing you, albeit remotely.

Webinar: Remote Work and Cyber Security

Presenter: bit-x-bit EVP & General Counsel John Unice, Esq.
