You want protection from the dangers—
and help with the disasters—of electronic data
theft and security issues.

We get it.   bit-x-bit [SM]
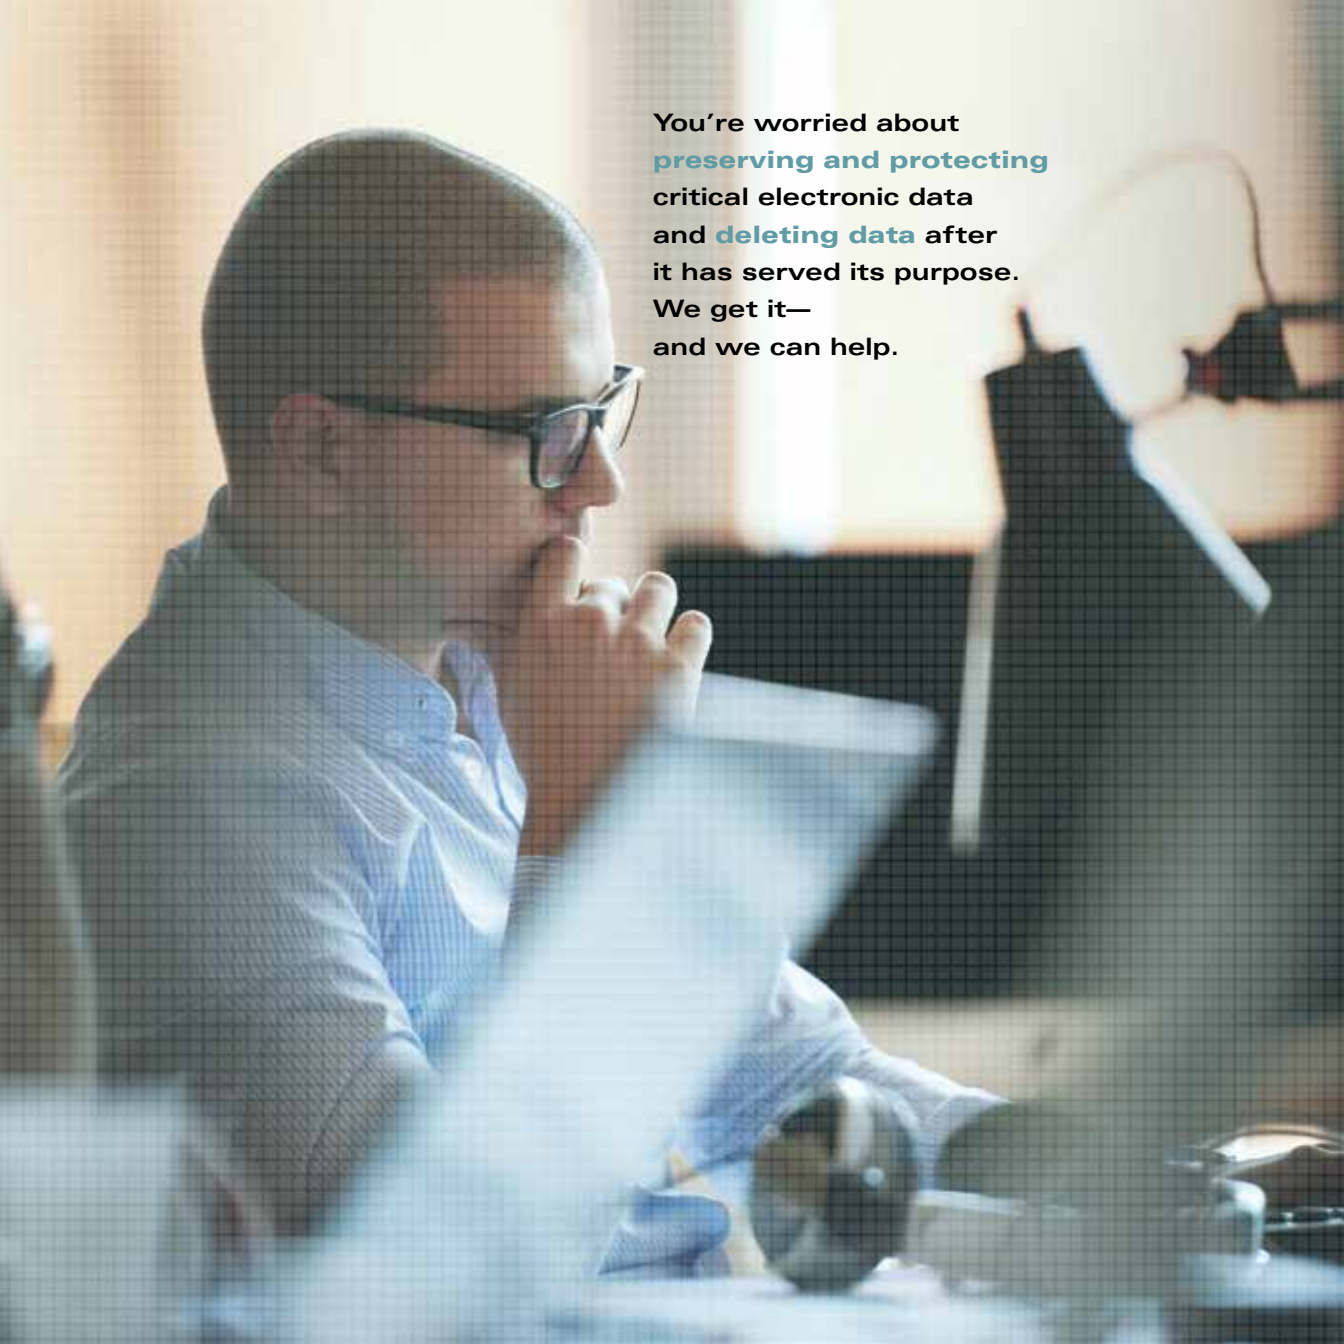

Protect your company **now** and into the **future**

Count on our experts to relentlessly secure your electronic data—day in, day out and in response to any event. No one protects, recovers and analyzes electronic data and artifacts like bit-x-bit. Our integrated risk and response services can be invaluable in your day-to-day handling of data, as well as in cases of litigation or emergencies like lost, stolen or breached data. As pioneers in the field of electronic data discovery and forensics, we've seen a lot, handled a lot and learned a lot. Thanks to our extensive experience, we've developed new ways to help you understand your risk, clean up your archives and guard your data to protect your company—before incidents occur. Of course, should you need digital forensics and e-discovery, we have the most powerful and efficient tools at hand. We also have a proven track record, having been tapped by companies of all sizes to resolve problems that often baffle others. Talk to bit-x-bit. **We get it.**

You're worried about **preserving and protecting** critical electronic data and **deleting data** after it has served its purpose. We get it— and we can help.

PREPARE. ORGANIZE. PROTECT.

Learn about our essential services including information governance, risk assessment and incidence response planning.

How vulnerable are your systems? Rather than fret, find out. Ask bit-x-bit to perform vulnerability scans of your external and internal systems on a regular or one-time basis. We can also analyze your network for threats, from phishing to ransomware. And we can check laptops, desktops, mobile devices and servers for any signs of compromise.

Right now, you may have critical data that could simply walk out the door on a USB or be uploaded to cloud locations outside your control. We protect important assets like client information, trade secrets, pricing and intellectual property by identifying, tracking and investigating company computers and mobile devices for potential theft by departing employees.

bit-x-bit can also help with information governance. Rather than holding on to terabytes of useless archived data, we can identify and preserve only the data you need to retain for business purposes or litigation. Discover how bit-x-bit can help you minimize your risks regarding electronic data with integrated services that offer protection, prevention and peace of mind.

Talk to us about:
- Information Governance
- Protecting Intellectual Property/Trade Secret Theft
- Network Threat Intel Assessment
- End Point Based Triage Assessment
- Vulnerability Assessment

You want the
smartest answer for
finding **critical evidence**
or dealing with
computer breaches.
We get it—
quickly and efficiently.

SEARCH. DISCOVER. RESPOND.

Learn about our proven capabilities in computer forensics, e-discovery and incident response.

In the event of an internal or governmental investigation or litigation, you may need to search for critical evidence in a mountain of electronic information. We're ready for your biggest challenge – sifting through thousands of emails, millions of documents and terabytes of data to find the exact information you need.

We excel at unearthing, analyzing, distilling and interpreting electronic evidence buried in computers, networks, mobile devices and laptops. Better yet, we have the tools, including artificial intelligence (CAL and TAR), tenacity and talent to deliver the job on time and on budget.

Unfortunately, no network is ever 100% immune to attack. While we can do much to guard you from incidents, we can also do a lot to help if they occur. In the event of a security breach, our forensic experts come quickly to your rescue— working to identify and contain the breach, preserving the evidence that exists in fleeting data packets.

Talk to us about:
- E-Discovery
- Computer and Mobile Device Forensics
- Data Analytics and Visualization
- Document Review Teams
- Incident Response
- Data Loss Protection

**You want to work
with a team that
has you covered
before—and if—
something happens.
We get it.**

RELENTLESS. RELIABLE. READY.
Learn more about us and our
integrated risk and response services.

Learn more about bit-x-bit and our tenacious efforts to protect,
recover and analyze electronic data. Discover our unusual
blend of legal and computer expertise. Learn how our cutting
edge technology uses data analytics and visualization to get
answers faster than ever. And get in-depth knowledge about
our integrated services to minimize your risk and maximize
your response to electronic data and security issues.
